4.2. Offline image language: change

• Starting Windows 11, the default System UI Language set by DISM is left unaltered on all editions except for Home edition. For all commercial editions the language chosen during the Out-of-Box Experience (OOBE) is set as the System Preferred UI language and Windows will be displayed in this language and for Home edition the language chosen at OOBE will continue to be the default System UI Language.

- As of Windows 10, version 2004, if an .appx-based Language Experience Pack (LXP) backed language is passed as an
 argument then the language will be set as the System Preferred UI language and its parent language will be set as the
 Default System UI language. In prior versions only .cab based language packs were supported.

2. Deployment Engine: Advanced

2.1. Deployment engine: adding process

After copying the deployment engine, you can add deployment tags to intervene in the installation process.

2.2. Unattended solution

When the customization is unattended, please modify it simultaneously if the following files exist:

- D:\OS_2022\Autounattend.xml
- D:\OS_2022\Sources\Unattend.xml
- D:\OS_2022\sources\\$OEM\$\\$\$\Panther\unattend.xml
- D:\OS_2022_Custom\Install\Install\Mount\Panther\Unattend.xml

2.2.1. Multilingual or monolingual

In multi-language and monolingual, you can switch between each other. When replacing, please replace all the same ones in the file.

2.2.1.1. Multi-language

<UILanguage>%OSDUILanguage%</UILanguage><InputLocale>%OSDInputLocale%</InputLocale>

```
<SystemLocale>%OSDSystemLocale%</SystemLocale>

<UILanguage>%OSDUILanguage%</UILanguage>

<UILanguageFallback>%OSDUILanguageFallback%</UILanguageFallback>

<UserLocale>%OSDUserLocale%</UserLocale>
```

2.2.1.2. Monolingual

A single language needs to specify a language tag, for example, specify a language tag: zh-CN

<UILanguage>zh-CN</UILanguage>

<InputLocale>zh-CN</InputLocale>

<SystemLocale>zh-CN</SystemLocale>

<UILanguage>zh-CN</UILanguage>

<UILanguageFallback>zh-CN</UILanguageFallback>

<UserLocale>zh-CN</UserLocale>

2.2.2. User plan

By default, the self-created user Administrator is used and logged in automatically. It can be switched by modifying the following configuration: self-created or customized user.

2.2.2.1. Self-created user Administrator

By default, the self-created user: Administrator is used and logged in automatically, inserted between <OOBE> and </OOBE>.

```
<UserAccounts>
 <LocalAccounts>
   <LocalAccount wcm:action="add">
    <Password>
      <Value></Value>
      <PlainText>true</PlainText>

 </LocalAccounts>
</UserAccounts>
<AutoLogon>
 <Password>
   <Value></Value>
   <PlainText>true</PlainText>
 </Password>
```

<Enabled>true</Enabled>

</AutoLogon>

2.2.2.2. Custom user

After setting up a custom user and installing the system, in OOBE, you can choose settings such as local and online users.

2.2.2.3. Delete

Username: Removed from start <UserAccounts> to </UserAccounts>

Autologin: Remove from start < AutoLogon > to </ AutoLogon >

2.2.2.4. Replace

From the beginning <OOBE> to </OOBE>

<OOBE>
